Dynamic Group to Break Ground on Victory Farms Renewable Energy Digester Facility

REVILLO, SD—

Dynamic has partnered with CE bp Renew LLC to develop Victory Farms Renewable Energy, one of the newest anaerobic digester facility projects to be designed and operated by Dynamic in Revillo, South Dakota.

Miron Construction Co., Inc. will serve as the design builder and McMahon Group as the engineering partner. During the construction phase of this project, there will be a tremendous financial benefit to the community. Local subcontractors will receive work valued at more than \$11M. Once this project is fully operational, 4 full-time positions will be essential to run the facility.

The setup will include a state-of-the-art nutrient management system. Victory Farms will utilize 2 digesters, running 24/7 to produce renewable natural gas (RNG). The RNG produced will be injected into the interstate pipeline and used to create compressed natural gas (CNG) for vehicles resulting in decreased dependency on fossil fuels.

This digester facility is a freestanding project. That means that the two digesters on the property will be utilizing the manure from the 5,000 jersey cows within the Victory Farm. This process provides the farm with the ability to protect natural resources by reducing potential greenhouse gas emissions. In addition, it will allow the farm to decrease the volume of manure to be land applied. As a result of the anaerobic digestion process, there will be more than a 90% reduction in the odor compared to non-digested dairy manure. Residents of the area will certainly appreciate the reduced odor during the land application of manure.

About Dynamic

Dynamic Group has several current ongoing biodigester projects in progress in addition to Victory Farms Renewable Energy, including BC Organics (Greenleaf, Wis.), Ash Grove Dairy (Lake Benton, Minn.), Drumgoon Dairy (Lake Norden, S.D.), Marshall Ridge Farms (State Center, Iowa), Newalta Dairy (Pipestone, Minn.), Tri-Cross Dairy (Viborg, S.D.), and Van Winkle Dairy (Canistota, S.D.)

Dynamic Group was founded in 2011 and is a full-service company that provides leading edge waste recovery solutions for both the Agricultural and Food Processing Industries. Three of its founding owners are involved with the daily operations of the business. They are the driving force of the company by integrating Dynamic's technology and design into the following areas: landfill diversion, anaerobic digestion, nutrient concentration, and water treatment. Dynamic adds a unique value in the field by being experienced, and knowledgeable in the finance, design, development, operation, and management of customized world-class infrastructure assets. These turnkey renewable energy and clean water solutions dispose of organic waste to impact the economy in environmentally friendly ways. For more information, visit dynamicgrp.us/victory-farms.

About bp

bp's ambition is to become a net zero company by 2050 or sooner, and to help the world get to net zero. bp is America's largest energy investor since 2005, investing more than \$130 billion in the economy and supporting about 230,000 additional jobs through its business activities. For more information on bp in the US, visit www.bp.com/us.

About Clean Energy

Clean Energy Fuels Corp. is the country's largest provider of the cleanest fuel for the transportation market. Our mission is to decarbonize transportation through the development and delivery of renewable natural gas (RNG), a sustainable fuel derived from organic waste. Clean Energy allows thousands of vehicles, from airport shuttles to city buses to waste and heavy-duty trucks, to reduce their amount of climate-harming greenhouse gas. We operate a vast network of fueling stations across the U.S. and Canada. Visit www.cleanenergyfuels.com and follow @CE_NatGas on Twitter.

About Certarus

Certarus delivers low carbon energy solutions that help customers improve environmental performance and lower operating costs. Through integrated and sustainable Energy-as-a-Service platform, they leverage the latest technology to safely deliver compressed natural gas (CNG) and hydrogen to industrial and commercial customers and offer last mile logistics support for renewable natural gas (RNG) developers. With the largest fleet of advanced carbon fiber trailers in the world, their compression and transportation network provide a mobile energy distribution solution that ensures a safe and reliable flow of energy without the need for pipeline infrastructure. For more information, visit certarus.com.

About McMahon Group

McMahon Group has provided professional engineering and architectural services to their valued customers for more than a century. Their team includes 150 professional engineers, architects, surveyors, technicians, field personnel, and administrative specialists, working from offices in Wisconsin, Illinois, and Indiana. For more information, visit mcmgrp.com.

About Miron Construction Co., Inc.

Miron Construction, one of the nation's premier construction firms and industry leaders, provides innovative preconstruction, construction management, design-build, industrial, and general construction services nationwide. The forward-thinking, century-old private company is headquartered in Neenah, Wisconsin, with regional offices in Eau Claire, Green Bay, Madison, Milwaukee, and Wausau, Wisconsin, and Cedar Rapids, Iowa. Ranked 68th among the "Top 400 Contractors in the United States", 96th among the "Top 100 Green Building Contractors in the United States", and 183rd among the "Top 250 Global Contractors" by Engineering News Record (ENR) (based on annual revenue), Miron is also the Official Provider of Construction Services for the Green Bay Packers and Lambeau Field. For more information, please visit www.miron-construction.com/.
